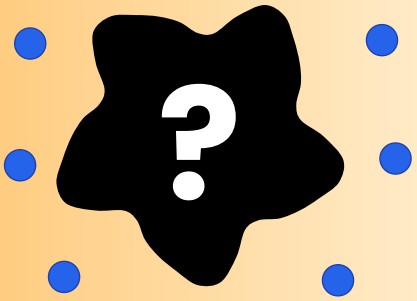
Petit SPLAT!

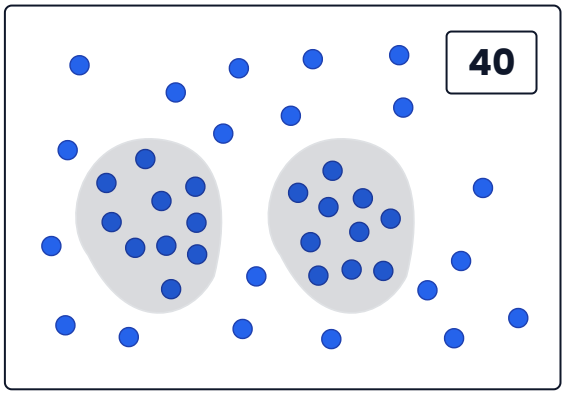
**Le tout, les parties…
et jusqu'à 50 jetons !**

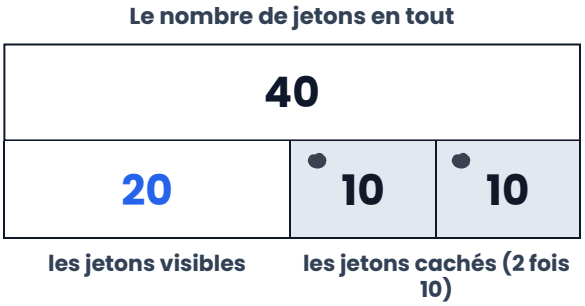


COMMENT ÇA MARCHE ?

Au total, il y a 40 jetons : les 2 taches en cachent une partie.

Ici les taches sont transparentes : on voit les jetons cachés. Chaque tache en cache le **même nombre**. Le schéma en barres représente la situation.





Prénom	Classe

DANS CE LIVRET

1 Complète le schéma

2 Dessine les jetons

3 Mélange !

4 Deux taches

5 Plein de taches !

6 Dessine en expert

LE LIVRET EST FINI ?

Et après ?

ENCORE DES CARTES !

Le jeu en tire douze nouvelles à chaque fois. Choisis ton niveau :

Une tache

Une seule tache, jusqu'à 50 jetons — comme les fiches 1 à 3.

Plein de taches

De 2 à 6 taches, jusqu'à 50 jetons — comme les fiches 4 à 6.

Expert · 1 tache

Une seule tache, jusqu'à 100 jetons.

Expert · 2 à 6 taches

De 2 à 6 taches, jusqu'à 100 jetons !

La suite du voyage

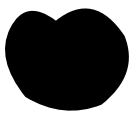
Après les taches, l'enquête et l'équation : va voir les mondes 2 à 6 de l'univers SPLAT!

POUR SE SOUVENIR

14

Le nombre encadré, c'est le **total** : tous les jetons, ceux qu'on voit et ceux qui sont cachés.

Les points bleus, ce sont les **jetons visibles** : on peut les compter.



La tache cache un certain nombre de jetons : c'est **ce qu'il faut trouver** ! Lorsque plusieurs taches apparaissent, elles cachent le même nombre de jetons.

Jeu **SPLAT!** créé par **Steve Wyborney** (stevewyborney.com) — merci Steve !
